

Supported File Formats

Thank you for referring to this document. Perfect Image supports the following programs. In addition to the supported file formats below, additional programs not listed may be supported. Please note that every program has bugs and potential problems that may cause time-consuming issues. Even fully supported applications can have issues that may result in delays or additional charges. If you have questions, please call to confirm.

		Latest Version	Previous Versions		
 Fully Supported  Old version. You need to upgrade!  Problems almost guaranteed! * ²					
 Supported. Upgrade preferred.  Serious problems * ¹		 Not supported at all			
* ¹ Problems with application may result in unexpected additional charges.		* ² Expect additional charges			
	Program	Latest Version	Previous Versions		
Mac & PC	Adobe InDesign PREFERRED PROGRAM	 CS (5.0)	 2.0.3	 < 2.0	
InDesign CS seems to be a very stable product. We no longer support version 1 and all version 1 files will be opened in the newer application. Please read the warnings about the use of transparency features, drop shadows and placing of native Illustrator and PhotoShop files.					
Mac & PC	Quark Xpress	 8.0	 7.0	 6.5	 5.0
Mac & PC	Adobe Illustrator	 CS5	 CS	 9.0	 8.0
Read the warning about the use of transparency features and drop shadows in version 9, 10 & CS. Illustrator CS changes the type engine and type created in an older version will likely rewrap in CS. Please save all files as .eps and import into Quark Xpress or InDesign for output. Failure to do so will result in hourly charges for Perfect Image to do so.					
Mac & PC	Macromedia FreeHand	 MX (11)	 10.0	 9.0	 8.0  7.0
Freehand continues to be a very stable product. Watch out for spot color blends. No files are output directly from FreeHand. Please save all files as .eps and import into Quark Xpress or InDesign for output. Failure to do so will result in hourly charges for Perfect Image to do so.					
Mac & PC	Adobe PhotoShop	 CS (5.0)	 7.0	 6.01	 6.0  5.0
The staple for color correction and image manipulation.					
Mac & PC	Adobe Acrobat Includes Distiller & Acrobat Application	 9.0	 8.0	 7.0	 4.0
Print-ready PDFs are acceptable. All fonts and high-resolution support must be embedded. Bleeds should also be included in PDFs. Edits are minimal to none.					

Supported File Formats, continued

WE DO NOT SUPPORT PAGEMAKER	
WE DO NOT SUPPORT COREL DRAW OR PHOTOPAINT	
	Corel PhotoPaint and all other Corel products not listed
	 Any Version
Mac & PC	Microsoft Word
	 Any Version
WE DO NOT SUPPORT MICROSOFT WORD FILES FOR PRINT PRODUCTION.	
Mac & PC	Microsoft Excel
	 Any Version
<p>Do not copy-and-paste Excel charts or tables into other programs. We have found that files do not output properly when created this way. Text can be either exported or copied from Excel. Charts must go through several steps before they can be reliably used in publishing programs. (Even this method is not problem free). EXCEL FILES ARE ONLY ACCEPTED FOR DATABASE USE.</p> <ul style="list-style-type: none"> • Print the page with the chart to a PostScript File • Open the PostScript file in Adobe Illustrator • Reconfigure all the colors to conform to CMYK or spot colors • Reconfigure all BLACK to be 100% black • Save as an EPS file • Import into your page layout program 	
Mac & PC	Microsoft PowerPoint
	 Any Version
<p>PowerPoint is a slide show/presentations package. It should never be used for publishing layout. WE DO NOT SUPPORT MICROSOFT POWERPOINT.</p>	
PC	Microsoft Publisher
